

# Shadin Fuel Flow System Simple Instructions

## How to Enter Full Fuel

1. Move the FULL/ADD toggle switch to the FULL position and hold.
2. Press the TEST/ENTER button.
3. Release the FULL/ADD toggle switch so it returns to the center position.
4. To verify, press the REM button. The total usable fuel will be displayed on the upper window.

## How to Add Fuel to an Existing Fuel Total

1. Move the FULL/ADD toggle switch to the ADD position and hold.
2. Press the REM button to increase the fuel added figure until the amount of fuel added is reached.
3. Press the TEST/ENTER button.
4. Release the FULL/ADD toggle switch so it returns to the center position. The computer will add the added fuel remaining and use the total as the current fuel remaining.
5. To verify, press the REM button. The current usable fuel remaining will be displayed on the upper window.

## How to Decrease Fuel from an Existing Fuel Total

1. Press and hold the USED button, and use the TEST/ENTER button to decrease the fuel.
2. Release both buttons.
3. To verify, press the REM button. The current usable fuel remaining will be displayed on the upper window.
